TeleEye Introduces New Member of MX Series HD CCTV Camera – MX873-HD

TeleEye is pleased to announce the launch of new MX Series HD CCTV camera – MX873-HD. MX873-HD incorporates with innovative HD SMAC-M multi-stream video compression technology. It is capable of HD live recording and multi-site video monitoring by working with TeleEye sureSIGHT Video Management Solution and sureREC HD Video Recording Solution.

Features of MX873-HD:

- 1/3.2" CMOS sensor, 2 megapixel
- f=2.7-9 mm Vari-Focal IR lens
- ~15m Illumination Range
- IP66 Weather Proof
- HD SMAC-M multi-stream coder
- 1600 x 900p; 1280 x 720p

World's First Multi-stream Coder HD SMAC-M for HD Video

MX873-HD incorporates with HD SMAC-M video coder, which is the world's first multi-stream coder for HD video. It allows simultaneous HD video recording and fast video transmission via LAN, broadband or mobile networks.

Wider View and Great Details

MX873-HD records HD video with a wide screen aspect ratio 16:9. The wide screen format provides 33% more viewing area than analog cameras. The wider view can greatly reduce blind spots in the surveillance system.

16:9 Wide Screen

4:3 Standard Resolution

With a resolution over 800TVL, it provides ultra-high resolution video quality and more detail for identification. By employing progressive scanning, TeleEye MX873-HD is also able to create images with least distortion and jaggedness.

Mobile and Portable Video Surveillance

MX873-HD can use with TeleEye M-303 or iView Mobile Video Monitoring System to deliver high definition video through mobile data network or WiFi. Users may view live video and receive event alerts on their iPhones or smartphones while they are on the move.
