FOR IMMEDIATE RELEASE

17<sup>th</sup> October 2002

**TeleEye M-Monitoring Solution Offers Remote Video for SingNet Outdoor Wireless Surf Zones**

**TeleEye** Group, a leading supplier of remote video monitoring systems, has released **TeleEye** M-monitoring Solution for professionals and managers to quickly, easily and conveniently access remote video of their business operations with a PDA anywhere and anytime. User can point-and-click his wireless PDA to connect a **TeleEye III+** transmission unit - located at a remote location for remote video monitoring anywhere and anytime.

The **TeleEye** M-monitoring Solution can operate on all mobile technology including GSM, CDMA, GPRS, PHS, HSCSD and wireless LAN. It works extremely well on wireless broadband and gives real time video. The Group has successfully tested the **TeleEye** M-monitoring Solution on SingNet's newly launched wireless broadband service. By using the **TeleEye** M-monitoring Solution with SingTel's wireless broadband service, managers are able to retrieve instant remote visual access to their business operations through their PDAs while moving freely around the "wireless surf zones". Powered by SingNet's wireless broadband infrastructure, Outdoor Wireless Surf offers broadband speeds of up to 512kbps, bringing users with high-quality video streaming with a PDA of up to 25fps.

The **TeleEye** Group believes the leading edge of **TeleEye** M-monitoring Solution can satisfy managers' needs who are frequently on the move. It aids them in keeping an eye on their business operations via a PDA to ensure smooth operations without being physically at the site. Now, managers can have peace of mind while sipping a cup of cappuccino at Starbucks.

With the growing demand of fast, convenient and mobile access to information, the Group believed that the **TeleEye** M-monitoring Solution could expand the scope of wireless application to the users and open the mobile video monitoring trend for the Singapore market.

The **TeleEye** M-monitoring Solution is also well received by other leading telecommunications operators. The Group had teamed up with the Hutchison Telecom in Hong Kong to jointly offer a high-speed wireless monitoring solution through their 2.5G service. This collaboration attracts extensive attention from media and public. Moreover, the NTT DoCoMo in Japan has tested the solution on their ( 3G ) FOMA mobile network. The Group believed that the **TeleEye** M-monitoring Solution have great potential in the worldwide mobile market.

The **TeleEye** M-monitoring Solution allows users to view multiple cameras/locations, offers alarm indication and notification, pre-alarm video monitoring, remote playback of recorded video, remote camera control ( P/T/Z ), password protection and multiple-users connection. Moreover, it is compatible with Pocket PCs running on Windows CE and Pocket PC 2002.
